MELANIE MOERTEL

2026 · BAMBERG / GERMANY

ABOUT

My practice explores the relationship between form, contrast, and the space between shapes. In my predominantly pastel series, I work with symmetry as a way of creating balance, rhythm, and visual tension. In contrast, my black series embraces asymmetry, allowing the forms and negative space to create a more dynamic and open composition. Across both bodies of work, I am interested in how subtle shifts in shape, contrast, and space can influence perception and emotion.
